130 dB SPL

Anti-Distortion

32-bit

Float
Onboard REC

External
Antenna

ClearVoice™
by Saramonic

Auto Gain
Control

Waterproof
Transmitter

Control with
Taps and Turns

Highlights:

- Built-in timecode for precise audio-video sync
- Handles up to 130 dB SPL without clipping
- External antenna for stable transmission up to 300 meters
- ClearVoice™ with noise cancellation, voice boost / low-cut, and automatic gain control
- 32-bit float onboard REC with 8 GB storage
- Transmitter with IPX5 water resistance

The Saramonic Ultra redefines wireless microphone excellence with its professional audio recording performance and sleek design. It features seamless timecode sync for audio and video, 32-bit float onboard recording, and handles up to 130 dB SPL, all while the state-of-the-art external antenna ensures stable audio transmission up to 300 meters. The Saramonic Ultra is the ultimate professional go-to solution for content creation, film production, live events, and challenging audio environments.

Quick Specs

Sample Rate / Bit Depth	48 kHz / 24-bit 48 kHz / 32-bit float (with onboard recording enabled)
Signal-to-Noise Ratio	> 90 dB
Max SPL	130 dB
Output Mode	Mono / Stereo / Safety Track / Headset / Headphone
Noise Cancellation	One-Click
Frequency Response	20 Hz - 20 kHz
Latency	25 ms
Low Cut	150 Hz
Transmission Range	300 m (with external antenna) 250 m (without external antenna)
Onboard Recording	8 GB
Built-in Mic	Premium MEMS Mic
Battery Life (Transmitter)	6 hours
Power Supply	Built-in Lithium-ion Battery
Charging While Recording	Yes
Clip	Metal / Non-removable / Non-rotatable
Support Mic in	Yes

BlinkMe Series

2.4 GHz Wireless Smart Microphone with Touchscreen

BlinkMe Series redefines what next-gen microphones can do. Built with Saramonic OS, the world's first operating system developed for microphones, BlinkMe brings an all-new user experience through the 1.36" full-screen true-color display. Broadcast-grade sound quality, intelligent onboard recording, visualization operation, and customizable themes are just some of the reasons for content creators, professional or beginning, to love it.

Highlights:

- Dual-channel wireless mic with touchscreen, featuring Saramonic OS and 4 control gestures: slide, tap, press, double tap
- Broadcast-quality sound: 48 kHz / 24-bit, 80 dB SNR, 20 Hz - 20 kHz, and 110 dB SPL
- 1.36" HD display with 360° viewing
- 9 themes and customizable DIY wallpaper
- 8 GB onboard REC 2.0 with auto-save every 30 min and timestamped files
- 8-level gain control
- Monitor and playback audio without removing receiver
- B2 version: compatible with cameras, mixers, smartphones and computers
- U2 version: features Lightning / USB-C for phones, laptops, and tablets

Saramonic Mix

2.4 GHz Professional Wireless Microphone with Mic In

 Mic In Pro Up	 AFH Anti-interference	 7.0 ms Ultra-Low Latency Audio-Video Sync
 AES 128-bit Secure Transmission	 AGC & Limiter Balanced Sounds	 Dual Monitoring Real-Time & Playback

Highlights:

- Mic in port connects wired lav mic for discreet recording
- Pro chip with adaptive frequency hopping for powerful anti-interference performance
- 7.0 ms ultra-low latency for audio-video sync
- AES 128-bit for secure transmission, protecting your privacy
- Auto gain control ensures balanced sound levels, while automatic limiting prevents clipping
- Dual monitoring for quick adjustments and simplifying your monitoring experience

Saramonic Mix brings you a step closer to a pro recording experience — discreet, reliable, and consistent. The transmitter's mic in port connects a wired lav mic for discreet recording, the pro chip resists interferences powerfully with AFH, and auto gain control for balanced sound levels. It is the ideal grab-and-go microphone for interviews, short video production, live streaming, and vlogging.

2-Level Noise
Cancellation

Saramonic Air is a pocket-sized wireless microphone that delivers richer, fuller sound than ever in an ultra-compact form. An industry-leading 90 dB signal-to-noise ratio keeps your sound clean with virtually no self-noise, while 120 dB max SPL handles volume spikes with ease. Step up your audio clarity with the exclusive ø9.7 mm lav mic. Its ø6 mm diaphragm is 1.5× larger than standard, picking up every detail from deep bass to crisp highs. The retro look turns heads, and the see-through window on case keeps everything in view. From daily vlogs to music production and interviews, Saramonic Air is your ideal go-to audio companion.

- Supports an exclusive ø9.7 mm lav mic for rich, detailed sound
- Industry-leading 90 dB SNR ensures studio-quality clarity
- 1.05" color display enable real-time monitoring
- Limiter & safety track prevent clipping
- 2-level noise cancellation & 3 EQ modes for custom sound
- One kit for all setups, hot shoe compatible

Saramonic Air SE

AI-Powered Clip-On and Handheld Wireless Microphone

5g Mic
Thumb-Sized

Clip-on & Handheld
Flexible Recording

True AI Noise Cancellation
Up to 40 dB

48 kHz / 24-bit
Pristine Sound

Limiter & Safety Track
Distortion Protection

3 EQ Presets
Easy Tone Tuning

Saramonic Air SE is an ultra-compact wireless microphone that works as both a clip-on and a handheld mic, all at an incredibly affordable price for mobile-first creators and content teams. Thumb-sized and weighing just 5 g, the mic wears almost unnoticed. Snap it back onto the charging bar and it instantly becomes a handheld mic, ready for interviews. The modular bar magnetically houses two mics and one receiver for easy carry. With Saramonic's first-ever true AI noise cancellation, paired with 48 kHz / 24-bit high-resolution audio, Air SE delivers crystal-clear, detailed sound you can rely on.

- 5g thumb-sized mic for discreet wear
- Magnetic charging bar doubles as a handheld interview mic
- True AI noise cancellation up to -40 dB
- 48 kHz / 24-bit audio, 80 dB SNR, 120 dB max SPL
- Limiter & safety track for distortion-free sound
- Control gain and EQ presets with the Saramonic app

Blink500 B2+

4-in-1 Wireless Microphone System

Highlights:

- Separate noise cancellation control - 48 kHz HD audio format retained
- Frequency response: 20 Hz - 20 kHz, deliver exceptional high-quality sound
- Low-cut filter: 75 Hz / 150 Hz
- Up to 150 meters of wireless transmission
- Mono / stereo / safety track output mode
- Up to 20 hours of operating time for a transmitter and 16 hours for a receiver
- Comes with a windproof capsule - minimize unwanted wind noise
- Receiver's 3.5 mm headphone output - monitor your audio in real-time
- High-resolution OLED display - see vital information at a glance
- 3.5 mm TRS, USB-C, Lightning output - universal compatibility with cameras, smartphones, and computers
- Charging case included - make the kit easy to carry on

The Blink500 B2+ is a portable 2.4 GHz wireless microphone system. It features high-performance noise cancellation, which is available for improving the recording effect in a noisy environment. The Blink500 B2+ is perfect for live streaming, vlogging, mobile journalism, and more. What's more, equipped with a low-cut filter, the wireless microphone can eliminate unwanted low-frequency noise (75 Hz / 150 Hz or lower) in your recording.

Blink500 B2+

Blink500 T4

4-Channel Wireless Microphone System

Highlights:

- Flexible with single or up to 4 channels
- Mixed or independent output for all 4 audio tracks
- Broadcast-quality with mitigated plosives: 48 kHz / 24-bit, 120 dB SPL
- Built-in condenser microphone for highly sensitive sound pickup at 360°
- Real-time monitoring and 7-level gain control to ensure optimal sound quality
- Intelligent noise cancellation, human voice recognition, and background noise filter
- Up to 100 meters of wireless transmission
- Up to 12 hours of battery life for transmitters, and 8 hours for receiver
- Compatible with phones and cameras, ideal for vlogging, livestreaming, and more

The Blink500 T4 is a professional wireless microphone system designed for multi-track recording. It supports up to 4-channel simultaneous recording, with options for independent or mixed output, providing excellent flexibility for post-production. Delivering true broadcast-quality audio, the Blink500 T4 is seamlessly compatible with various devices, making it an ideal companion for content creation, multi-person filming, and on-the-go interviews.

Blink500 ProX B8

4-Channel Wireless Lavalier Microphone System

Highlights:

- 4 audio tracks with mixing or independent output (mono / stereo options)
- 14-hour onboard recording with 8 GB storage
- IP66 protection on transmitter for dust and water resistance, paired with a built-in windproof capsule for any challenging conditions
- Stable wireless transmission up to 280 m line-of-sight
- 20 Hz - 20 kHz frequency response with noise cancellation for 48 kHz / 24-bit pristine audio recording
- Both transmitter and receiver run 11 hours per charge, with 22 hours total using the case

The Blink500 ProX B8 is a professional 4-channel wireless lavalier microphone system that captures multi-person audio in challenging environments easier than ever. It offers mixed or independent outputs for 4 audio tracks, 14-hour onboard recording with 8 GB storage, and reliable transmission up to 280 m line-of-sight. With Saramonic's innovative IP66 dust and water resistance on the transmitter and a built-in windproof capsule, the Blink500 ProX B8 is your team's perfect on-the-go companion for meetings, speeches, vlogging, and street interviews.

Saramonic System
Recordist Control Hub

Highlights:

- Ultra-wide UHF for ultra-stable performance
- 130 dB input & digital transmission for uncompressed recording
- IP67-rated ø3 mm lav mic for discreet and durable use
- 32-bit float onboard REC with 64 GB storage
- Timecode sync for streamlined post
- Saramonic System for up to 48 devices' control on your phone

Meet Saramonic K9, our first digital UHF wireless microphone for recordists. Featuring an ultra-wide UHF spectrum and auto frequency scanning, it resists interference in RF clutter. With digital transmission, a 130 dB dynamic range, and 32-bit float onboard recording, the system captures detail-rich recordings and ensure safe backup. Timecode-enabled, K9 syncs with cameras down to the frame, eliminating manual syncing in post-production. The ø3 mm ultra-miniature lav mic delivers unmatched durability, and flawless sound in any environment. With Saramonic System, all info and configurations are taps away on the phone, giving recordists easy full control.

Saramonic TC-NEO

Wireless Timecode Generator

- High Precision
< 1 Frame Drift in 48 Hrs
- Saramonic System
Sync Up to 48 Devices
- SMPTE-12M
LTC / Audio TC
- TC-NEO Kit
Made for Multi-Cam Sync
- Auto Align in Post
- 10+ Timecode Cables
Wide Compatibility

Highlights:

- High-precision with ± 0.05 ppm accuracy, <1 frame drift in 48 hours
- Generates SMPTE LTC/Audio TC timecode for broad compatibility
- Wireless sync between units, via app (up to 48), or wired with 3rd-party devices
- 1.1" OLED display with up to 22 hours of continuous runtime
- 3-unit cyber-style charging kit featuring digital clock mode
- 8 colored protective cases for instant group identification

Meet Saramonic TC-NEO, a wireless timecode generator built for precise and reliable sync and seamless integration with the Saramonic K9 to create a complete location sound system. The high-precision TCXO offers ± 0.05 ppm accuracy and keeps drift under 1 frame over 48 hours, ensuring dependable performance on long shoots. Bluetooth enables one-tap sync of up to 48 devices via the Saramonic System App, or direct wireless sync between units without the app. For multi-camera shoots, it comes in a first-of-its-kind charging kit that houses and powers three units, offering all-day power and easy setup, so post runs smoother and faster. Whether you're filming drama, documentary, or news, TC-NEO keeps your workflow tight and your sync flawless.

SaramonicTC-NEO

Timecode Generator	× 3	SR-USB-C01 USB-C to USB-C Charging Cable	× 1	Protective Case (Orange, Blue, and Yellow)	× 3

Weight	TC-NEO: 42.5 g Charging Kit: 265 g
Dimensions	TC-NEO: 49 × 37 × 19 mm (L × W × H) Charging Kit: 182.7 × 65 × 41.5 mm (L × W × H)
Operating Temperature	-20°C to 55°C

Timecode Cable List

SR-TRS-C01
3.5 mm to 3.5 mm

Works with mainstream timecode generators and UHF microphones, like Tentacle SYNC E, Deity TC-1, Saramonic UwMic9 / VmicLink5, Deity D2RX, Sony URX-P41D and Sennheiser XSW-D RX.

SR-USB-C02
3.5 mm to USB-C

Works with Saramonic K9.

SR-TRS-C03
3.5 mm to 5-Pin Right Angle

Works with mainstream movie cameras, like Arri Alexa Mini.

SR-TRS-C06
3.5 mm to BNC

Works with professional cameras and recorders, like Blackmagic Ursa Mini, Canon EOS C50 / C70 / C300 Mark II / III, Sound Devices MixPre-10 II, Sony Broadcast Cameras, Zaxcom Nova / Nova2, and Zoom F4 / F8 / F8n / F8n Pro.

SR-TRS-C07
3.5 mm to 4-Pin

Works with professional cameras and recorders, like RED DSMC2 Jetpack Expander / Jetpack-SDI Expander / V-Lock I/O Expander.

SR-TRS-C08
3.5 mm to 9-Pin

Works with professional cameras and recorders, like RED Komodo 6K / V-RAPTOR.

SR-USB-C03
3.5 mm to USB-C

Works with mainstream DJI handheld cameras, like Osmo Action Series and Pocket Series.

SR-TRS-C04
3.5 mm to 5-Pin LEMO

Works with professional audio recording devices, like Arri Alexa Cameras, Ambient Timecode Generators / Timecode Slate, Sound Devices Scorpio, Denecke TS-C, and Wooden Camera B-Box.

SR-TRS-C05
3.5 mm to 5-Pin LEMO Right Angle

Works with professional audio recording devices, like Arri Alexa Cameras, Ambient Timecode Generators / Timecode Slate, Sound Devices Scorpio, Denecke TS-C, and Wooden Camera B-Box.

SR-TRS-C09
3.5 mm to Din 1.0/2.3

Works with mainstream Canon cameras, like Canon EOS R5 C.

SR-TRS-C10
3.5 mm to Sony Multi Interface

Works with mainstream Sony cameras, like FX3 / FX30 / a1 / a7S III.

WiTalk9

9-Person Full-Duplex Wireless Intercom Headset System

 9-Person System HUB-Free	30+ Up to 30-Person Team Talk	 Dual-Antenna Up to 500 m Intercom	ClearTalk™ ClearTalk™360°ENC
 Remote Intercom	 AGC Algorithm	 Aviation-Grade Cooling Gel Cushions	 IPX5 Rating

Highlights:

- Hub-free and scalable to 30 users
- Dual antennas for reliable communication within 500 m
- Proprietary ClearTalk™ for noise cancellation at 360°
- AGC and high volume for clear talk in noisy places (130 dB SPL)
- Works with Saramonic app for system control and AFH
- Cross-city / region communication via online meeting platforms
- Aviation-grade ear cushions
- Waterproof (IPX5) and wind-resistant (level 3 wind)
- 9-hour battery life for master and 15 remotes

The WiTalk9 series is a 9-person full-duplex wireless intercom headset system designed for medium to large teams that require high call quality, stability, and multiple channels. It features Saramonic ClearTalk™ technology, including a 360° noise-canceling three-mic array and a proprietary noise cancellation algorithm, along with dual antennas and a DECT system with encryption, ensuring stable and clear team communication up to 500 meters even in noisy environments with dense RF interference.

Quick Specs

Frequency Band	1.9 GHz
Communication Range	500 meters
Number of Channels	9
Cascading	No HUB needed. Scalable for up to 30-person use.
Noise Cancellation	Three-mic array and noise cancellation algorithm, optional with Weak/Strong mode.
Frequency Response	150 Hz - 8 kHz
Latency	≤ 83 ms
Waterproof / Windproof	IPX5 Waterproof; Resistant to Level 3 Wind
Remote Communication	Via a wireless or wired connection.
App Control	Yes
Adaptive Frequency Hopping	Yes
Pull Up Mic Boom to Mute	Yes
One-click to Broadcast or PTT	Yes
Monitoring	Yes
Charging while Using	Yes
Weight	228 g (with battery)
Material for Headset's Frame	PC+30GF
Ear Cushions	Quick detach. Over-ear aviation-grade cooling gel ear cushions + On-ear form cushions
Battery Life	Master: 9 hours; Remote: 15 hours

WiTalk9 X

9-Person Modular Full-Duplex Wireless Intercom System

Modular Design
3 Ways to Wear

AI Noise Cancellation
2-Mic Array

Dual-Antenna
Up to 400 m Intercom

WiTalk Base Cascading
Scalable to 64 Users

172g Headset
IPX4 Water Resistant

Saramonic App
Master Control

Highlights:

- Modular headset switches between single, dual-ear, and helmet-ready
- 2-mic array with AI noise cancellation reduces up to 40 dB noise
- Dual antennas enable communication up to 400 m
- 9-person hub-free system, expandable to 64 users with BASE
- Saramonic App enables fast setup, monitoring, and system control
- 10+ accessories for easy replacement and extended lifespan

Saramonic WiTalk9 X is a lightweight full-duplex wireless intercom system for production teams. Its modular design supports single-ear, dual-ear, and helmet-ready configurations for flexible use and easy maintenance. Powered by 1.9 GHz DECT with dual antennas and AI noise cancellation, it delivers stable, clear communication up to 400 m. Paired with WiTalk Base, it supports 16-person full-duplex communication, expandable to 64 users by cascading up to four bases, delivering professional performance for productions of any scale.

WiTalk9 SE

2.4 GHz Full-Duplex Wireless Intercom Headset System

 5-Person System Scalable to 9 Users	 Dual-Antenna Up to 350 m Intercom	 ClearTalk™360°ENC	 Saramonic App Master Control
 Master-Free	 2.4 GHz Global Roaming	 24-Hour King of Power	 10+ Optional Accessories

Highlights:

- Hub-free and scalable to 9 users
- Dual antennas for reliable communication within 350 m
- Proprietary ClearTalk™ for noise cancellation at 360°
- AGC and high volume for clear talk in noisy places (120 dB SPL)
- Master-free - Every headset can be a master
- Works with Saramonic app for system control and AFH
- Cross-city / region communication via online meeting platforms
- 24-hour battery life for every headset

The WiTalk9 SE series is a 2.4 GHz, 5-person wireless intercom headset system, designed for teams of up to 9 members. It is ideal for small to medium-sized teamwork in environments with minimal interference. Incorporating Saramonic ClearTalk™, a 360° noise-cancelling three-mic array and a proprietary noise cancellation algorithm, along with dual antennas, the system ensures clear communication within a range of 350 meters. Featuring Master-Remote switching and decentralized group settings, the WiTalk 9 SE system offers enhanced flexibility for team collaboration and an optimized value for money.

Quick Specs

Frequency Band	2.4 GHz
Communication Range	350 meters
Number of Channels	5
Cascading	No HUB needed. Scalable for up to 9-person use.
Noise Cancellation	Three-mic array and noise cancellation algorithm, optional with Weak/Strong mode.

WiTalk Base

Wireless Intercom Base Station

Highlights:

- Supports 16 full-duplex users per base, expandable to 64 users via 4-base linking
- Up to 8 role-based talk groups for clear multi-department communication
- 1.9 GHz DECT with up to 700 m wireless range for large productions
- 4-wire analog interface supports major third-party intercom systems
- USB-C computer connection enables remote collaboration via online meeting platforms
- Web and App control for grouping, monitoring, and system management

WiTalk Base is the central hub of the Saramonic WiTalk wireless intercom system, built for large production teams that need scalable and reliable communication. A single base supports up to 16 full-duplex headsets and expands to 64 users by linking four bases, with support for up to 8 role-based talk groups. Operating on 1.9 GHz DECT, it delivers up to 700 m range, while dual side antennas improve stability in complex RF environments. A 4-wire analog interface enables integration with third-party systems, while the 5-inch color display allows efficient system management and monitoring.

Everything Podcast

The Saramonic SR-BV1 is a cardioid dynamic microphone, providing broadcast-quality sound, specially designed for applications like broadcasting, podcasting, studio recording, and more. The cardioid pickup pattern focuses on the sounds in front while still offering a high level of rear rejection. The SR-BV1 provides silky smooth high frequencies, detailed mid-range response, and warm, round, bass reproduction to make it an absolute standout in its class. Its improved and removable foam windscreen and internal pop filter minimize plosives, ideal for recording vocals.

SR-BV1

Dynamic Broadcasting Microphone

Highlights:

- High-quality dynamic broadcasting microphone
- Cardioid pickup pattern
- Full metal housing
- Low self-noise
- Wide-range frequency response
- Gold-plated XLR connector

Quick Specs

Dimensions	190 x 37.65 x 30 mm
Weight	705 g
Microphone	Dynamic
Polar Pattern	Cardioid
Connector	XLR
SPL	130 dB
Output Impedance	120 Ω
Frequency Range	20 Hz - 20 kHz
Sensitivity	-57 dB
Threaded Interface	5/8
Housing	Metal

The Saramonic SR-BV3 is a cardioid dynamic microphone, featuring broadcast-quality sound, modes of low cut and high-frequency boost. It is specially designed for applications like broadcasting, podcasting, studio recording and more. Excellent cardioid polar pattern can clearly capture the voice in front of the mic.

Highlights:

- Cardioid polar pattern
- Low-cut (75 Hz / 150 Hz)
- High-frequency boost
- 50 Hz -16 kHz Frequency Response
- 48 kHz / 96 kHz, 16-bit / 24-bit, 80 dB SNR, 132 dB SPL
- Wide compatibility with XLR and USB-C output
- Easy-to-operate touch panel

SR-BV3

Dynamic Broadcasting Microphone

Quick Specs

Dimensions	154.3 × 152.9 × 85.6 mm
Weight	425 g
Microphone	Dynamic
Polar Pattern	Cardioid
Connector	XLR / USB-C / 3.5mm
Sample Rate / Bit Depth	48kHz / 96kHz 16-bit / 24-bit
Signal-to-Noise Ratio	80 dB
SPL	132 dB
Output Impedance	350 Ω
Frequency Range	50 Hz - 16 kHz
Sensitivity	-55 dB
Human-machine Interaction	Touch Button
Power Supply	USB-C 5 V
Threaded Interface	5/8
Housing	Metal

The Saramonic SR-BV4 is a large-diaphragm condenser microphone with a smooth, flat, wide-range frequency response, providing broadcast-quality sound, specially designed for applications like broadcasting, podcasting, studio recording, and more. The SR-BV4 features a 34 mm diaphragm and super-cardioid polar pattern, delivering exceptional and professional quality sound. It provides silky smooth high frequencies, detailed mid-range response, and warm, round, bass reproduction to make it an absolute standout in its class, ideal for a wide range of recording applications, including vocal, electric instruments, percussion, and professional studio use.

Highlights:

- High-quality studio condenser microphone
- 34 mm large diaphragm
- Supercardioid pickup pattern
- Deliver exceptional and professional quality sound
- Gold-plated XLR connector
- Rugged metal construction
- Powered by 48 V phantom power
- Shockmount, pop filter included

SR-BV4

Large Diaphragm Condenser Microphone

Quick Specs

Dimensions	165 x 52 x 52 mm
Weight	373 g
Microphone	Condenser
Polar Pattern	Supercardioid
Connector	XLR
Signal-to-Noise Ratio	80 dB
SPL	120 dB
Output Impedance	200 Ω
Frequency Range	20 Hz - 20 kHz
Sensitivity	-34 dB
Power Supply	48 V
Threaded Interface	5/8
Housing	ABS

The Saramonic SR-BH700 are professional monitoring headphones designed for precise audio monitoring in music production and critical listening. With a wide 20 - 28 kHz frequency range and 50 mm large-aperture drivers, they deliver deep bass and crisp highs. The over-ear protein leather cushions provide excellent isolation and lasting comfort, offering a premium listening experience for music creators and audiophiles.

SR-BH700

Large Diaphragm Condenser Microphone

Highlights:

- 50 mm large-aperture drivers
- Titanium-plated metal diaphragm
- 20 Hz - 28 kHz frequency response
- Professional HiFi audio cable included
- Ergonomic earcups and cushions
- Durable metal cantilever and earcups
- Wide compatibility with 3.5 mm and 1/4" port

Quick Specs

Driver Diameter	ø 50 mm
Audio Input	3.5 mm Jack with a Twist-to-lock System
Maximum Input Power	800 mW
Impedance	32 ohms
Frequency Response	20 Hz - 28 kHz
Sensitivity	98 dB/mW
Dimensions	214.5 × 178.3 × 91.6 mm
Weight	373 g
Audio Cable Length	1.2 m (3.9")

The MV-Mixer is a dual-channel audio interface providing a simple recording and mixing solution for musicians, podcasters, producers, and more. It features two XLR-1/4" TRS combo jacks for mic, line, and instrument inputs, independent gain and volume controls, a studio-grade 1/4" TRS headphone output for rich sound reproduction, and supports up to 192 kHz / 24-bit recording for crystal-clear audio. This compact interface gives you everything you need to create professional-quality recordings across a range of audio applications.

MV-Mixer

Dual-Channel Audio Interface

Highlights:

- Dual XLR-1/4" TRS combo jacks for mic, line, and instrument input
- Record audio at up to 192 kHz / 24-bit audio resolution
- 48 V phantom power for two XLR inputs
- Real-time monitoring and playback
- Independent gain and volume controls with indicator brightness change when adjusting
- Red LED indicator of channel clipping

Quick Specs

Sample Rates	44.1 / 48 / 88.2 / 96 / 176.4 / 192 kHz
Power Requirement	USB Bus Powered
Microphone Power Supply	48 V Phantom Power (Only for XLR inputs)
Supported System	Windows / Mac OS
Compatible Software	Logic Pro X / Cubase / Adobe Audition
Frequency Response	Mic / Line / Inst Inputs: 20 Hz - 20 kHz ± 1 dB
Dynamic Range (A-weighted)	Mic / Line / Inst Inputs: 20 Hz - 20 kHz ± 1 dB Line / Monitor Outputs: 102 (A-weighted) Headphone Outputs: 105 (A-weighted)

Output Impedance	Line / Monitor Outputs: 560 Ω Headphone Outputs: 10 Ω

The SR-HC5 is a versatile table-mounted microphone boom arm, perfect for podcasting, live streaming, voiceover recording and more. With a 37" total reach and a 360° swivel base, it ensures you get the mic in the best spot to optimize its performance. The lockable twist-lock knobs keep your mic securely in place, while the hide-away cable management keeps your setup clean and clutter-free. Made from durable aluminum alloy, it's easy to mount with a C-clamp for a sleek, professional look.

SR-HC5

Microphone Boom Arm

Highlights:

- Compatible with a wide variety of microphones including the SR-BV1, SR-BV3 or other broadcast mics weighing up to 2.2 lb
- Durable C-clamp mount for table attachment
- Adjustable hinge controls for 180° adjustments
- Built-in cable catch designed for cable management
- Includes 5/8 to 3/8" adapter

Quick Specs

Size	Horizontal: 430 mm (17") Vertical: 663 mm (26")
Weight	1,364 g (3 lbs)
Max Weight Capacity	1 kg (2.2 lbs)

Shotgun Essentials

The SoundBird Series, including the V1 and V6, are professional shotgun condenser microphones that deliver studio-quality sound for filmmaking, interviews, and field production. With a directional supercardioid pattern, durable all-brass construction, and gold-plated XLR output, they provide clear audio and smooth signal transfer. The V1 also features a high-pass filter, a -10 dB pad for handling loud sounds without clipping, and a low-cut filter to eliminate rumble, all controlled via dedicated illuminated buttons. Lightweight and portable, the SoundBird Series is the perfect companion for a wide range of sound applications.

Highlights:

- Supercardioid pattern for precise audio capture
- The V1 with a high-pass filter and a -10 dB Pad handling loud sound without clipping and a low-cut filter (200 Hz) to eliminate rumble
- 48 V phantom power (The V1 also supports AA battery)
- Rugged brass build prevents RF interference
- Gold-plated XLR connector resists corrosion and ensures excellent signal transfer
- Includes foam windscreen, shock mount for camera, stand, or boompole, and the V6 adds fur windshield and mic clip

SoundBird

The Saramonic BoomPole Lite is an ultra-light, durable carbon fiber boom pole with an internal coiled XLR cable. Its three-section telescoping design extends from 1 to 2.5 m, offering discreet microphone positioning while staying out of the frame. Compact enough for easy transport, it fits into a backpack or the included padded case, making it ideal for location recording.

Highlights:

- 3-section telescoping boom pole that extends from 1 to 2.5 m
- Constructed of reinforced carbon fiber for lightweight, rugged, and comfortable use
- Large and comfortable foam-padded grip area with easy-twist locks
- Features a 1/4"-20 mounting stud with both 3/8" and 5/8" adapters
- Includes a padded carry case for easy transport or storage

Quick Specs

Material	Carbon Fiber
Min Length	1 m (3")
Max Length	2.5 m (8.2")
Weight	722 g (1.59 lbs)
Load Capacity	Up to 3 kg (6.6 lbs)

Boompole Lite

Cable Fiber Boompole with Internal XLR Cable

The Saramonic VWS is a blimp windshield and shock mount suspension system. It is designed to protect your shotgun microphone from wind noise, and isolate your recording from shock and vibration.

Highlights:

- Eliminates wind noise
- Isolates from shock and vibration
- Furry windshield included
- Fits most shotgun microphones (Length ≤ 380 mm, φ = 19 - 23 mm)
- Lightweight anti-skidding handle with 3/8" thread mount
- Internal coiled XLR cable

Quick Specs

Microphone Compatibility Dimensions	Diameter: 1.91-2.31 m Length: 3.7 m
Internal Cable Connectors	3-Pin XLR
Internal Spacing	Diameter: 1.25 m Length: 4 m
Dimensions	4.8 x 1.3 x 1.9 m (Min) 4.8 x 1.3 x 3.2 m (Max)
Net Weight	Up to 3 kg (6.6 lbs)

Accessories

The SR-MH1 is a universal handheld holder for wireless clip-on mics. Simply slide in your transmitter for a polished, professional look on camera — perfect for interviews, presentations, news reporting, speeches, podcasts, and more.

Highlights:

- Ideal for handheld interviews, presentations, news reporting, vlogging, and speeches
- Compatible with numerous other wireless transmitters on the market
- Rugged ABS construction with lightweight and ergonomic design
- Includes a foam windscreen for wind protection

Quick Specs

Dimensions	23.7 x 27 x 18 mm without windscreen
Weight	82 g without windscreen
Clip Receptacle Dimensions	19 x 35 mm (0.75 x 1.38")

SR-MH1

Handheld Holder for Wireless Microphone

The SmartRig II is a compact audio interface that connects professional XLR microphones and instruments to your iOS or Android device. With a wide frequency response (20 Hz to 20 kHz), 3.5 mm headphone monitoring, and 48 V phantom power, it delivers crystal-clear recordings and playback. Ultra-compact, lightweight, and easy to use, the SmartRig II is the perfect solution for content creation, news gathering, broadcasting, and more.

Highlights:

- Ultra-compact, lightweight and easy to use
- Combo 1/4" (6.35 mm) and XLR input
- Power by 9 V battery or 48 V phantom power
- 1/8" (3.5 mm) headphone output for monitoring

Quick Specs

Frequency Response	20 Hz - 20 kHz, +/- 1.5 dB
Noise	-98 dB Full Band (with Phantom Power)
Maximum Output Level	2 Vrms
Distortion	0.025% THD
Channels	1
Inputs	1 x XLR + 1/4" (6.35 mm) Combo Jack
Outputs	1 x Male 1/8" (3.5 mm) TRRS Output Cable and 1 x Female 1.8" (3.5 mm) Headphone Jack
Dimensions	41 x 42 x 88 mm
Weight	75 g

SmartRig II

Audio Adapter

The Saramonic AX1 is an incredibly compact and lightweight battery-free 2-channel audio mixer. It features two 3.5 mm TRS inputs with dedicated input level attenuators and a single 3.5 mm TRS output with a selectable Mono/Stereo output switch. It also includes both 3.5 mm TRS and TRRS output cables, making it an ideal mixing solution for DSLRs, mirrorless and video cameras, smartphones, handheld recorders, laptops, and much more.

Highlights:

- Two 3.5 mm stereo input to a single 3.5 mm TRS output
- Selectable Mono/Stereo output
- 20 Hz - 20 kHz frequency response and -35 dB input level
- Includes 3.5 mm TRS to TRS and TRRS audio cables
- Compact and Lightweight to fit into even the tightest set-ups

Quick Specs

Inputs	2 x 3.5 mm TRS
Output	1 x 3.5 mm (TRS Mono/Stereo)
Frequency Response	20 Hz - 20 kHz
Input Level	≥ 35 dB
Dimensions	48 x 25 mm (1.89 x 0.98")
Weight	19 g (0.67 oz)

AX1

2-Channel Audio Mixer

SR-C2000

Lightning (Male) to 3.5 mm TRS (Male) Adapter

Highlights:

- For connecting Saramonic microphone to Apple devices with a lightning port
- Compatible with iPhone 5 and later models
- Cable length: 20 cm

SR-C2001

USB-C (Male) to 3.5 mm TRS (Male) Adapter

Highlights:

- Connects USB-C devices with audio devices with a 3.5 mm output port
- Available for stereo audio recording
- Cable length: 20 cm

Audio Cables

SR-C2002

Lightning (Male) to 3.5 mm TRRS (Female) Adapter

Highlights:

- Connects audio devices with a 3.5 mm male jack with Apple devices with a lightning port
- Compatible with iPhone 5 and later models
- Cable Length: 6 cm

SR-C2003

USB-C (Male) to 3.5 mm TRS (Female) Adapter

Highlights:

- Connects audio devices with a 3.5 mm male connector with devices with an USB-C port
- Cable Length: 6 cm

SR-C2004

3.5 mm Stereo TRS (Male) to Dual Locking-Type 3.5 mm TRS (Male) Y-Cable

Highlights:

- It can be used split stereo signal into left and right
- Cable Length: 30 cm

SR-C2005

USB-C (Male) to (Female) Right Angle Adapter

Highlights:

- Designed to fit the USB-C cable into a tight space when connecting a microphone to a smartphone mounted on a gimbal

SR-C2006

USB-C (Male) to 3.5 mm TRS (Female) Adapter for DJI Pocket 2 and DJI OSMO™ Pocket

Highlights:

- Record audio to DJI Pocket 2 or DJI OSMO™ Pocket from most microphone, mixers or audio adapters with a standard 3.5 mm output jack
- Cable Length: 6 cm

SR-C2007

3.5 mm (Female) TRS to DJI OSMO™ Action USB-C Adapter

Highlights:

- Record audio to the DJI OSMO™ Action from most microphones with a standard 3.5 mm output jack
- Cable Length: 6 cm

SR-C2018

3.5 mm TRS (Female) to Lightning (Male) Audio Adapter

Highlights:

- Ideal input audio adapter for Apple iPhones and iPads with Lightning
- Gold-plated connector to provide the best possible signal transfer and resist corrosion
- Cable length: 7.4 cm

SR-C2019

Dual 3.5 mm TRS (Male) to Four 3.5 mm TRS (Male) Adapter Cable

Highlights:

- Gold plated connectors for corrosion-resistant signal transfer
- Cable length: 60 cm

SR-C2020

Dual 3.5 mm TRS (Male) to Four XLR (Male) Adapter Cable

Highlights:

- Ideal for converting the output of dual wireless systems into 4 separate XLR inputs
- Cable length: 60 cm

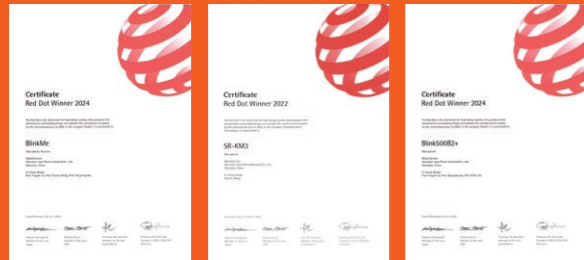

Sound Remarkable. Celebrated Worldwide.

Quick Specs

Maximum Users	16 Users
Operating Range	Up to 700 m
Grouping Capability	8 Groups
Network Bridging	✓ (Conference Software Compatible)
UAC (USB)	✓
Cascading	✓ (Up to 4 WiTalk Base)
Ecosystem Compatibility	Compatible with WiTalk9 / WiTalk9 X
3rd-Party Interoperability	Compatible with Clear-Com, Hanson, Altair, Datavideo, Hollyland, and LaON systems
Power Supply	DC / V-mount Battery / G-mount Battery
System Control	Mobile App / PC Web
Waterproof / Windproof	IP66
Dimensions	302 x 181.52 x 63.6 mm
Weight	1.79 kg
